| Category | Activity | Making Paper using Towels and Candles using Japanese Paper |
|---|---|---|
| Field | Japanese Culture | |

Dissolving the fibers of the hybrid mulberry tree, or "kozo", smoothing it out flat, and drying it is the process called "kamisuki," or Japanese papermaking. Through this program, by using a towel to smooth out the fibers and COPYING the fabric of the towel, participants can easily make original Japanese paper. Using the paper they've made, they can enclose an LED candle and make a mini-LED Japanese paper candle. Participants can make their own one-of-a-kind candle.
